Abstracts

The global Vending Machines market was valued at 6695.24 Million USD in 2021 and will grow with a CAGR of 3.08% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Intelligent vending machines incorporate energy efficient electronic equipment including efficient lighting components, such as LEDs, compressors, and sensors, that help in conserving energy. Industry players are progressively participating and promoting initiatives, such as Refrigerants and Naturally!, that help in eliminating and minimizing the release of hydrofluorocarbons (HFC) from vending machines. This is subsequently impelling the demand for HFC-free products such as intelligent vending systems.
