Vital signs monitoring devices perform monitoring of vital parameters such as blood pressure, heart rate, respiratory rate and body temperature. Vital signs monitoring devices industry has high technology barrier and is technology intensive industry. Currently, there are several producing companies in the world vital signs monitoring devices industry. The main market players are Philips, General Electric and Mindray Medical International Limited. In consumption market, Europe and USA are the mainly consumption regions due to the bigger demand of downstream applications. In 2015, these two regions occupied 51.53% of the global sales revenue in total. Vital signs monitoring devices mainly has two types, which include traditional monitoring devices and microwave monitoring devices. And each type has application industries relatively. With medical effect of vital signs monitoring devices, the downstream application industries will need more vital signs monitoring devices. So, vital signs monitoring devices has a huge market potential in the future. Manufacturers engaged in the industry are trying to produce portable and noncontact vital signs monitoring devices through improving technology. The major raw materials for vital signs monitoring devices are casing, microelectronic and electrode. Fluctuations in the price of the
