## Abstracts

The global Washer-Disinfectors market was valued at 22.95 Million USD in 2021 and will grow with a CAGR of 3.17% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Washer-disinfectors (WDs) are defined by the Food and Drug Administration (FDA) as Class II medical devices intended for general medical purposes to clean, decontaminate, disinfect and dry surgical instruments, anesthesia equipment, hollowware and other medical devices. The technical barriers of washer-disinfectors are not high, and the major players are Steelco SpA, Miele, Belimed, Getinge Infection Control, Steris, AT-OS, CISA, SciCan, Tuttnauer, Eschmann Equipment, Skytron, IC Medical GmbH, Ken A/S, and Smeg Instruments. These companies mainly concentrate in Europe and USA. Europe is the largest consumer, more than 44% of total consumption in 2015. In the past few years, the price of washer-disinfectors has decreased and we expect the price will slightly lower. However, the improvement of energy, transportation costs, employee wages, and equipment depreciation will play a significant role in promoting the cost of washer-disinfectors. As the same time, companies are focusing on technological innovation, equipment upgrades, and process improvements, to reduce costs and improve quality. With the snatch for market share in emerging regions, the competition in washer-disinfectors industry will become more intense.
