## Abstracts

The global Waste Treatment Disposal market was valued at 12029.54 Million USD in 2021 and will grow with a CAGR of 3% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Waste Treatment Disposal market includes many types of waste, like waste water, solid waste, this report only focus on the solid waste that can be treatment through the methods of landfill, incineration, recycling etc. The solid waste includes Municipal Solid Waste (MSW), Commercial and Industrial (C&I), construction and demolition waste (C&D).The Waste Treatment Disposal industry concentration is not high; there are so many players in the world, and high-end technology mainly from U.S. and Western European. Global giant manufactures mainly distributed in U.S. and E.U. The manufacturers in U.S. have a long history and unshakable status in this field. Players such Waste Management and Republic Services have relative higher level of product's quality. As to France, Veolia Environment has become as a global leader. Many companies have several plants, usually locate in the place close to aimed consumption region. There are international companies set up factories in China either. Some companies usually take a joint venture enter into aim market. The key sales markets locate at developed countries. The United States takes the market share of 31.4%, followed by Europe with 24.6%. China's consumption market has a quicker growing speed of CAGR 5% from 2012 to 2017. We tend to believe this industry becomes more

and more mature, and the consumption increasing rate will show a smooth curve. The market is not only influenced by the price, but also influenced by the service performance. Although China domestic companies have price advantage, the service is narrow to some extent. Looking to the future years, the fluctuation of price trend in recent years will maintain. As competition intensifies, prices gap between different brands will go narrowing. Similarly, there will be fluctuation in gross margin. Company mergers and acquisitions, and inter-companies cooperation have occurred for development and growth. As the downstream consumption usually follows with developed and rapid economic growth areas, such as BRICS, the developed areas` company prefers investing to underdevelopment regions these years. This industry is affected by the economy and policy, so it`s important to put an eye to economic indexes and leaders` prefer. With the global economic recovery, more and more people pay attention to rising environment standards, especially in underdevelopment regions that have a large population and fast economic growth, the need of Waste Treatment Disposal will increase.
