The global Water Purifiers market was valued at 1270.69 Million USD in 2021 and will grow with a CAGR of 7.31% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Water purifier, as the name means, is tool or equipment used for the purification of drinking water. In general, water `purifiers` can apply to any type of water filtration system including active carbon filters, UV Ultraviolet filtration systems, carbon-filtered water pitchers, faucet-installed carbon filters, water distillers, reverse osmosis systems, chemically-treated and municipal chlorinating water processes. In this report, we will mainly analyze household water purifiers for providing clean and safe drinking water. The demand of water purifier worldwide is increasing quickly, and it is forecasted to continue in the following several decades. At the same time, as more enterprises have entered the market and the capacity of water purifier is increasing too fast, currently a lot of water purifier enterprises don't have enough sales order for producing in a full capacity.
