Water Scale Removal is a special equipment of water treatment using physical method. It is the method that uses a magnetic or electrostatic field to alter the reaction between scale-forming ions in hard water, to achieve scale prevention, scale removal effect. As Chinese overall economic downward trend in the past few years, and international economic situation is complicated, in the next few years there will be many uncertainties, and coupled with Water Scale Removal industry in short supply on the market in the past few years, more and more companies enter into Water Scale Removal industry, the current demand for Water Scale Removal product is relatively low, lack of demand, excess supply.
