The global Water Soluble Film market was valued at 31.31 Million USD in 2021 and will grow with a CAGR of 3.96% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

This report studies the water soluble film market. Water soluble (PVA/PVOH) film is commercially made from polyvinyl alcohol resins and due to its water soluble property, is widely used for water soluble small dose packaging of detergents, agrochemicals, water treatment chemicals, dyes, and food. Apart from these applications, water soluble (PVA/PVOH) film is used in embroidery and laundry bag manufacturing. PVA film is the largest type of water soluble film. Currently, about 94% water soluble film is PVA film. Raw material of water soluble film is mainly PVA, which is mainly produced in Asia, especially in China. Global major production regions are Japan, USA, Europe and China. In 2017, Japan is the largest production region, which produced 19506 tons water soluble film. USA is the second largest production region in 2017. Leaning on great environmental protection performance, water soluble film consumption will be higher. We predict that global consumption will be 77469 tons in 2024, with a CAGR of 6.05% during 2019-2024.
