The global Waterjet Cutting Machinery (Waterjet Cutting Machines) market was valued at 92.92 Million USD in 2021 and will grow with a CAGR of 2.42% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Waterjet machines provide an efficient method of producing intricate components of machines with relative ease and precision. It facilitates versatile and effective machining, cutting, and shaping of metals and other materials. A waterjet machine uses a pump to eject water at an extremely high pressure through a nozzle to cut metals and other materials. These machines generate a lesser amount of heat compared to other cutting technologies and can, therefore, be used even on materials that are highly sensitive to high temperatures. Waterjet machines also help to ensure minimal wastage of the material being machined. The global waterjet cutting machines industry markets mainly concentrate in Europe, North America, Japan and China. And the market is supplied by a combination of large multinational firms and smaller local companies. The leading global firms include Flow International, Omax, Bystronic Group, Sugino Machine, ESAB Cutting Systems and others. These companies tend to compete against each other globally to supply most of the largest waterjet cutting machines markets. In many markets, these leading global firms also face competition from local players. The global market of waterjet cutting machines has mainly been driven by its downstream

industry, the strong growth of the automotive, stone & tiles, job shop, aerospace & defense and other industrial field in the last decade. Economic investment and national policies are also the main growth catalysts for the market. Despite the presence of competition and brand effect problems, due to the awareness of end-users and their demand for high end products, investors are still optimistic about this area. There will be more new investors entering into this industry in the future. The manufacturers who want to occupy the market must depend on market mechanism reform, core technology improvement, manufacturing equipment innovation, and brand establishment.
