Completion, in petroleum production, is the process of making a well ready for production (or injection). This principally involves preparing the bottom of the hole to the required specifications, running in the production tubing and its associated downhole tools as well as perforating and stimulating as required. Sometimes, the process of running in and cementing the casing is also included. This report covers traditional and intelligent completions equipment. Between these, intelligent completions incorporate permanent downhole sensors and surface-controlled downhole flow control valves, enabling the operators to monitor, evaluate, and actively manage production (or injection) in real time without any well interventions. Data are transmitted to surface for local or remote monitoring. Schlumberger was the world's biggest manufacturer in the Well Completion Equipment industry, accounted for 16.4% market share of the global market, followed by Baker Hughes, Halliburton, Weatherford International, Welltec, Packers Plus, National Oilwell Varco, Forum Energy Technologies, CNPC, Wellcare Oil Tools, Schoeller-Bleckmann, Completion Technology Resources, Innovex Downhole Solutions, SPT Energy Group, Yantai Jereh, Petro-king, COSL. The top 5 companies had a combined market share of 61% of the global total. North America was the largest
