Wheat seed refers to the seed of wheat, one of the most widely cultivated and consumed cereal crops worldwide. Commonly, there are two sources of wheat seed, one is selected and saved by farmers from harvested wheat and the other is bred and produced by commercial enterprises. In this report, we will only have analysis on the market, enterprises and other information about commercial wheat seed. Seed enterprises consider wheat seed to be of secondary importance, since it is a self-pollinating crop and the grain can be used as seed, farmers tend to replant their own seed. Currently, the commercial rate of wheat is not that high, there is quite large market potential.
