Abstracts

The global White Board market was valued at 30.33 Million USD in 2021 and will grow with a CAGR of 1.71% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A whiteboard (also known by the terms marker board, dry-erase board, wipe board, dry-wipe board, pen-board, and the misnomer [citation needed] grease board) is any glossy, usually white surface for nonpermanent markings. For industry structure analysis, the White Board industry is fragmented. A variety of manufacturers ranging from large multinational corporations to small privately owned companies compete in this industry. Some producers don't have its own brand and do the OEM. The top 5 producers account for about 22% of the sales market. The production of White Board increases from 2145K Units in 2012 to 2565 K Units in 2016, with CAGR 4.57%. For forecast, the global White Board revenue would keep increasing with annual growth rate with 2-3%, and a little higher speed in Asia-Pacific. We tend to believe that this industry still has a bright future, considering the current demand of White Board. As for product prices, the slow downward trend in recent years will continue in the next few years, as competition intensifies. Similarly, there will be fluctuations in gross margin.
