The global X-Ray Diffractometer (XRD) market was valued at 613.44 Million USD in 2021 and will grow with a CAGR of 3.22% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

X-ray Diffractometer (XRD) is a laboratory-based technique commonly used for identification of crystalline materials and analysis of unit cell dimensions. One of two primary types of XRD analysis (X-ray powder diffraction and single-crystal XRD) is commonly applied to samples to obtain specific information about the crystalline material under investigation. X-ray powder diffraction is widely used in geology, environmental science, material science, and engineering to rapidly identify unknown crystalline substances (typically in less than 20 minutes). A pure, finely ground, and homogenized sample is required for determination of the bulk composition. Additional uses include detailed characterization of crystalline samples, determination of unit cell dimensions, and quantitative determination of modal amounts of minerals in a sample. X-ray powder diffraction can also be applied to the identification of fine-grained minerals. At present, China's manufacturers are Liaoning Dandong Haoyuan instrument, Dandong Tongda Technology Co., Ltd., Dandong Aolong and Beijing Persee Analysis Instrument. The production areas of X-Ray Diffractometer (XRD) of Chinese local enterprises are mainly distributed in Liaoning Province and Beijing city. Liaoning Province is the main production area of X-Ray Diffractometer (XRD), accounting for

76% of the national production in 2019. In terms of product types, X-Ray Diffractometer (XRD) generally can be divided into powder X-ray diffraction and single-crystal X-ray diffraction. Among them, in the Chinese market in 2019, powder X-ray diffraction accounted for the largest proportion of the market, close to 99%.
