The global X-Ray Lead Glass market was valued at 122.27 Million USD in 2021 and will grow with a CAGR of 1.37% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The shielding effect is created by a high concentration of lead and barium and the glass can be optically clear. The lead lined glass is manufactured in a variety of sizes, shapes and thicknesses depending on the intended application, the thicker the lead glass, the higher the level of radiation shielding. Radiation shielding glass provides protection while allowing technicians to view imaging or radiation therapy procedures and is used in permanent and modular shielding applications. Leaded glass can also be laminated to meet safety specifications for impact resistance. China is the emerging market of X-Ray lead glass. The X-Ray lead glass from China still has certain quality gap with foreign products. China famous suppliers include AnLan, Shenwang Radiation Protective Equipment and PLATEC Group etc. Also, Corning has production base in China.
