X-Ray Security Scanner is a machine that offers high energy X-ray systems designed to meet the full range of cargo inspection applications. The linear accelerator X-ray sources penetrate even the densest cargo. The resulting high quality images enable inspectors to detect hidden contraband, including weapons, explosives, weapon of mass destruction, drugs, and undeclared goods. Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area; the future will still have more new investment enter the field. For X-Ray Security Scanner product demand market there is also a certain space, but basically showing the scarcity of high-end products, there is a large market demand for high-end products to seize market share of imports acts. Along with the development of Chinese domestic X-Ray Security Scanner, Chinese domestic X-Ray Security Scanner downstream market has been very mature and advanced; this will have a good influence on X-Ray Security Scanner industry. The government police strongly influenced X-Ray Security Scanner industry. Because of the support of Chinese government, sales of China's X-Ray Security Scanner industry will grow at a high rate of 9.15% in 2016-2022. Although sales of X-Ray Security Scanner brought a lot of

opportunities, the study group recommends the new entrants just having money but without technical advantage and downstream support do not to enter into the X-Ray Security Scanner field.
