The global Zinc-Air Batteries market was valued at 342.71 Million USD in 2021 and will grow with a CAGR of 6.34% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Zinc-Air Batteries is metal-air batteries powered by oxidizing zinc with oxygen from the air. These batteries have high energy densities and are relatively inexpensive to produce. Sizes range from very small button cells for hearing aids, larger batteries used in film cameras that previously used mercury batteries, to very large batteries used for electric vehicle propulsion. The technical barriers of Zinc-Air Batteries are relatively high, and the Zinc-Air Batteries market concentration degree is relatively high. The manufacturing bases scatter around the world in terms of geography, but the key technology and high-end products are in the hand of the global leading enterprise like Rayovac (Spectrum), Energizer, Arotech, Duracell etc.
