Abstracts

Against the backdrop of doom and gloom predictions by some managers and analysts, we forecast a robust comeback of the X-ray security screening market, generating a solid 2016-2021 CAGR of 6.7%.

The X-ray security screening system market growth is driven by the following:

The 2015-2016 ISIS-inspired terror attacks in London, Manchester, Berlin, Paris, Brussels, Nice, Istanbul, the Middle East, Africa and the U.S.A., drove governments to overhaul their counter terror infrastructure and funding

The election of Donald Trump as U.S. president, promising throughout his campaign a tough fight against Islamist extremism terror at home and abroad and to invest in law and order (e.g., 'I am the law-and-order candidate'), will boost the federal U.S. X-Ray security screening-related legislation and budgets

President Trump's 2018 budget (published in May 2017) will increase the federal X-ray security screening related budgets

During the past 3 years, explosive-based terror attacks accounted for 56% of over 36,000 worldwide terror attacks

Transportation Security – the projected 2015-2021 5% air passengers and cargo CAGR will increase airport security X-ray market

Growth of the Asia-Pacific airport industry markets that increase airport security spending

The need to replace or upgrade 60,000 outdated X-ray screening systems with state-of-the-art systems

The 2016 supply side X-ray industry consolidation (Smiths Group acquired Morpho Detection and OSI Systems acquired AS&E) will moderate the industry's price competition

According to HSRC's "X-ray Baggage, Cargo, People, Container & Vehicle Screening Systems: Global Market – 2017-2021" report, the global X-ray security screening market revenues (including systems sales, aftersales services and upgrades) are forecast to grow by 48% during the report period.
