Abstracts

IRL is pleased to announce its first edition of A Profile of the Mexican Paint Industry. In the past, IRL had only released paint market data for Mexico as part of its regional study A Profile of the Central American and Caribbean Paint Industries.

Mexico's paints and coatings sector was valued at some US\$2,100 million in 2011. The elections taking place in July 2012 momentarily slowed down the pace of growth in the economy and had a negative effect on consumer confidence. Prior to that the sector was enjoying a period of rapid expansion with Mexico's GDP growth rate outperforming that of Brazil in 2011 and poised to surpass it once again in 2012.

A Profile of the Mexican Paint Industry has allowed IRL to expand on its country market coverage enabling us to provide a more in-depth insight into Mexico's paint and coatings market status.

The study examines nine mainstream coatings segments independently. It includes market data for 2011 and five year market forecasts to 2016 for each of these, with further anticipated figures for 2012. Market dynamics and trends for each coating type are provided with an indication of market splits by technology and/or chemistry where possible.

More detailed information on the contents of the report is given on the right.

Research for this title included a comprehensive programme of desk research and an extensive number of interviews with senior industry executives across all of the examined sectors. Interviews were conducted by a native Spanish speaker between July and September 2012.

This report will serve as a valuable tool to strategic planners, business analysts and

marketing managers involved in the manufacture, distribution and marketing of paints and coatings and their raw materials.
