Abstracts

IRL is pleased to announce the publication of a new report which takes a comprehensive look at the nano-materials for coatings market in Europe. The market has been segmented and analysed by coating application based on the expectations and knowledge of coating industry experts.

The markets covered will include nano-materials for:

Automotive coatings

General industrial coatings

Architectural coatings

Wood coatings

Functional coatings

This report is designed to complement IRL's published reports on other paints and coatings markets, which have focused on the analysis of coatings by application and country/region.

All of the data for this report has been gathered via primary telephone and face-to-face interviews with senior executives in the coatings and coating materials industry during the second quarter of 2011.
