Abstracts

Medical Tourism Global Potential Facts and Figures 2019 examines the global background and potential, for medical and health tourism in 165 countries.

This is the most comprehensive report ever on global medical tourism by an author who has been writing about medical tourism for 15 years.

This report investigates current and potential opportunities for medical tourism by analysing inbound and outbound numbers by country and revenue.

Report Summary

Global medical tourism is increasing annually. What is changing rapidly is each country's share of the total, and the type of medical tourist they are attracting,

It highlights those countries that are or are becoming major destinations, why, and what they are doing to promote their country.

The report shows where medical tourists are coming from, the treatments they seek, and why they go where they do,

Key Findings

The global demand for medical tourism is changing

Some countries see increasing numbers but others struggle

This is a very fluid market

Some strategies and marketing are working well

This market is not just price driven

Successful countries work hard to attract medical tourists

Reason to Buy

Every country and organisation needs to update and refine its medical tourism strategy and to do that they need to know the latest on which countries are doing well, who goes there, the treatment they seek and why they go there.

This bang up to date report is essential reading to any organisation serious about medical tourism, with background material suitable for both experts and newcomers.

The report analyses figures and does not accept them at face value.
