Abstracts

This study covers the latent demand outlook for asphalt paving mixtures and blocks across the states and zip codes of the United States. Latent demand (in millions of U.S. dollars), or potential industry earnings (P.I.E.) estimates are given across some 10,833 zip codes in the United States. For each zip code in question, the percent share the zip code is of its state and of the United States as a whole is reported. These comparative benchmarks allow the reader to quickly gauge a zip code vis-à-vis others. This statistical approach can prove very useful to distribution and/or sales force strategies. Using econometric models which project fundamental economic dynamics within each state and zip code, latent demand estimates are created for asphalt paving mixtures and blocks. This report does not discuss the specific players in the market serving the latent demand, nor specific details at the product level. The study also does not consider short-term cyclicalities that might affect realized sales. The study, therefore, is strategic in nature, taking an aggregate and long-run view, irrespective of the players or products involved.

This study covers asphalt paving mixtures and blocks as defined by the North American Industrial Classification system or NAICS (pronounced "nakes").

The NAICS code for asphalt paving mixtures and blocks is 3241210. It is for this definition that aggregate latent demand estimates are derived. Asphalt paving mixtures and blocks is specifically defined as follows:

3241210 ASPHALT PAVING MIXTURES AND BLOCKS

32412101 Asphalt paving mixtures and blocks

3241210111 Emulsified asphalt, including liquid additives

3241210121 Other liquid asphalt and tar paving materials, including cut backs

3241210131 Asphalt and tar paving mixtures (excluding liquid), including bituminous or asphaltic concrete, and asphaltic paving cements

3241210141 Other asphalt paving mixtures, excluding brick, concrete, granite, or stone
