## Abstracts

This study covers the latent demand outlook for cast iron boilers and radiators, baseboard and finned tube-type, residential, special-type and other aluminum and non-ferrous metal radiators and convectors excluding electric across the states and zip codes of the United States. Latent demand (in millions of U.S. dollars), or potential industry earnings (P.I.E.) estimates are given across some 10,833 zip codes in the United States. For each zip code in question, the percent share the zip code is of its state and of the United States as a whole is reported. These comparative benchmarks allow the reader to quickly gauge a zip code vis-à-vis others. This statistical approach can prove very useful to distribution and/or sales force strategies. Using econometric models which project fundamental economic dynamics within each state and zip code, latent demand estimates are created for cast iron boilers and radiators, baseboard and finned tube-type, residential, special-type and other aluminum and non-ferrous metal radiators and convectors excluding electric. This report does not discuss the specific players in the market serving the latent demand, nor specific details at the product level. The study also does not consider short-term cyclicalities that might affect realized sales. The study, therefore, is strategic in nature, taking an aggregate and long-run view, irrespective of the players or products involved.

This study covers cast iron boilers and radiators, baseboard and finned tube-type, residential, special-type and other aluminum and non-ferrous metal radiators and convectors excluding electric as defined by the North American Industrial Classification system or NAICS (pronounced "nakes").

The NAICS code for cast iron boilers and radiators, baseboard and finned tube-type, residential, special-type and other aluminum and non-ferrous metal radiators and

convectors excluding electric is 33341411. It is for this definition that aggregate latent demand estimates are derived. Cast iron boilers and radiators, baseboard and finned tube-type, residential, special-type and other aluminum and non-ferrous metal radiators and convectors excluding electric is specifically defined as follows:

33341411 Cast iron boilers and radiators, and aluminum and other nonferrous metal radiators and convectors, including baseboard and finned tube type, residential, and special type (except electric)

3334141101 Gas fired cast iron boilers (except parts)

3334141106 Other cast iron boilers (except electric and parts)

3334141111 Cast iron and steel radiators and convectors (except parts)

3334141116 Aluminum and other nonferrous metal radiators and convectors, including baseboard and finned tube type, residential, industrial, and special type (except electric and parts)
