## Abstracts

This study covers the latent demand outlook for corn mill products across the states and zip codes of the United States. Latent demand (in millions of U.S. dollars), or potential industry earnings (P.I.E.) estimates are given across some 10,833 zip codes in the United States. For each zip code in question, the percent share the zip code is of its state and of the United States as a whole is reported. These comparative benchmarks allow the reader to quickly gauge a zip code vis-à-vis others. This statistical approach can prove very useful to distribution and/or sales force strategies. Using econometric models which project fundamental economic dynamics within each state and zip code, latent demand estimates are created for corn mill products. This report does not discuss the specific players in the market serving the latent demand, nor specific details at the product level. The study also does not consider short-term cyclicalities that might affect realized sales. The study, therefore, is strategic in nature, taking an aggregate and long-run view, irrespective of the players or products involved.

This study covers corn mill products as defined by the North American Industrial Classification system or NAICS (pronounced "nakes").

The NAICS code for corn mill products is 3112117. It is for this definition that aggregate latent demand estimates are derived. Corn mill products is specifically defined as follows:

3112117 Corn mill products

31121171 Corn mill products

3112117111 Whole cornmeal for human consumption, made in corn mills

3112117121 Degermed cornmeal for human consumption, made in corn mills

3112117131 Corn grits and hominy (except for brewers' use), for human consumption, made in corn mills

3112117141 Corn grits and flakes for brewers' use, for human consumption, made in corn mills

3112117151 Hominy feed, cornmeal, and other byproducts of dry corn milling (for animal feed)

3112117161 Corn flour, made in corn mills

3112117171 Other corn mill products, for human consumption
