Abstracts

This study covers the latent demand outlook for oak rough lumber not edge worked made in sawmills across the prefectures and cities of Japan. Latent demand (in millions of U.S. dollars), or potential industry earnings (P.I.E.) estimates are given across over 1,000 cities in Japan. For each city in question, the percent share the city is of its prefecture and of Japan as a whole is reported. These comparative benchmarks allow the reader to quickly gauge a city vis-à-vis others. This statistical approach can prove very useful to distribution and/or sales force strategies. Using econometric models which project fundamental economic dynamics within each prefecture and city, latent demand estimates are created for oak rough lumber not edge worked made in sawmills. This report does not discuss the specific players in the market serving the latent demand, nor specific details at the product level. The study also does not consider short-term cyclicalities that might affect realized sales. The study, therefore, is strategic in nature, taking an aggregate and long-run view, irrespective of the players or products involved.

This study covers oak rough lumber not edge worked made in sawmills as defined by the North American Industrial Classification system or NAICS (pronounced "nakes").

The NAICS code for oak rough lumber not edge worked made in sawmills is 3211131121. It is for this definition that aggregate latent demand estimates are derived. Oak rough lumber not edge worked made in sawmills is specifically defined as follows:

3211131121 Oak rough lumber, not edge worked, made in sawmills
