Abstracts

This study covers the world outlook for hybrid Street lighting systems across more than 190 countries. For each year reported, estimates are given for the latent demand, or potential industry earnings (P.I.E.), for the country in question (in millions of U.S. dollars), the percent share the country is of the region, and of the globe. These comparative benchmarks allow the reader to quickly gauge a country vis-à-vis others. Using econometric models which project fundamental economic dynamics within each country and across countries, latent demand estimates are created. This report does not discuss the specific players in the market serving the latent demand, nor specific details at the product level. The study also does not consider short-term cyclicalities that might affect realized sales. The study, therefore, is strategic in nature, taking an aggregate and long-run view, irrespective of the players or products involved.

In this report we define the sales of hybrid Street lighting systems as including all commonly understood products and/or services falling within this broad category, irrespective of product packaging, formulation, size, or form. Companies participating in this industry include Airsynergy, Bridgelux, Clear Blue Technologies, COVIMED Group, Deepa Solar Systems Pvt, Dongguan Link Light Solar Energy Science & Tech.Co., Dragons Breath Solar, Eco-Smart, Elecssol, Fosera GmbH & CompanyKGaA, Guangzhou HY Energy Technology Limited, Hi-VAWT Technology, Jinhua SunMaster Solar Lighting Company, KCP Solar Industries, LZ New Zealand, Omega Solar, Philips Lighting, Phono Solar Technology Company, R-Man High Tech Solar Private, SEPCO Solar Electric Power Company, Shanghai Ghrepower Green Energy Company, Shenzhen Spark Company, Solar Street Lights USA, Solektra International, Su-Kam Power Systems, Suneco Green Energy, Sunna Design, Suveg Electronics, Tata Power Solar Systems, UGE International, Urja Global, V-Air Wind Technologies, and Verysol Energy Nigeria. In addition to the sources indicated, additional information available to

the public via news and/or press releases published by players in the industry was considered in defining and calibrating this category. All figures are in a common currency (U.S. dollars, millions) and are not adjusted for inflation (i.e., they are current values). Exchange rates used to convert to U.S. dollars are averages for the year in question. Future exchange rates are assumed to be constant in the future at the current level (the average of the year of this publication's release in 2024).
