This series was created for international firms who rely on foreign markets for a substantial portion of their business or who might be threatened by international competition. The estimates given in this report were created using a methodology developed by and implemented under the direct supervision of Professor Philip M. Parker, the INSEAD Chair Professor of Management Science. The methodology relies on historical figures across countries. The figures should be seen as market estimates, as opposed to historical records, as these are projected for a specific year of trade.
