Abstracts

This report was created for strategic planners, international executives, and import/export managers who are concerned with the market for battery-powered clocks with watch movements excluding instrument panel clocks. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics that appear several years after the fact. He does so for the current year based on a variety of key historical indicators and econometric models.

'Battery-powered clocks with watch movements excluding instrument panel clocks' as a category is defined in this report following the definition given by the United Nations Statistics Division Classification Registry using the Standard International Trade Classification, Revision 3 (SITC, Rev. 3).
