Abstracts

The Canadian market for gastrointestinal endoscopic devices is the largest component of the market for endoscopic devices. The gastrointestinal endoscopic market includes GI endoscopes, ERCP devices, hemostasis devices, stents, dilation balloons, capsule endoscopy and tissue acquisition devices. In 2008, average selling prices increased steadily due to an increased use of high definition technology. The fastest growing segment for this market will be the capsule endoscopy market, which is expected to see tremendous growth over the forecast period.
