Abstracts

Over the 2011–2018 forecast period, market growth will remain strong and grow steadily. As the concept of dental implants penetrates the non-upper-class patient base, and more affordably priced implants from Chinese and South Korean companies are sold, increases in ASP growth are expected to slow. Moreover, development and acceptance of technologies that facilitate dental implant placement and restoration have increased in response to the high growth rate of the dental implant industry, further driving demand for implants. Abutment sales are dependent on the company's implant sales, and dental professionals are encouraged by packaging promotions and pricing structures to purchase both implants and abutments from the same manufacturer.
