Abstracts

The Chinese orthopedic biomaterials market is expected to approach \$522.3 million by 2019. The bone graft substitute segment is expected to constitute the majority of the Chinese orthopedic biomaterials market.

The Chinese orthopedic biomaterials market comprises bone graft substitutes which is segmented into allografts, demineralized bone matrices (DBM) and synthetics, and hyaluronic acid (HA) viscosupplementation. The market has seen increased interest in domestic competitors and some domestic competitors are in the process of clinical trials for synthetic, DBM, and bone morphogenetic protein (BMP) products. Further growth in the overall market will be fuelled by the Chinese government improving healthcare coverage across the country, leading to an increase in the number of Chinese people with more disposable income. The previous drivers are magnified by the increasing population of elderly, and the increased acceptance of surgery as a solution.

Scope: This report pertains to a forecast period of 10 years (2009 – 2019) for China.

Others Include: Award Trade Corporation (Kunming), Beijing Fito Medical, Beijing St. Jane Medical, Liweize Medical Devices, Shanghai Medcare, Shenzhen SMARL, and various domestic companies

Reasons To Buy:

This report analyzes and evaluates the current state of the market including existing and potential markets, product average selling prices, and unit volumes. The report also highlights the opportunities and potential hazards involved, and presents strategies for successfully navigating the market landscape. Furthermore, it seeks to identify the trends and technologies that will affect the future of each market segment and prepares an unbiased critical assessment of such market drivers and limiters based on our

“ground up” approach, which includes primary and secondary research methods.
