<https://marketpublishers.com/r/E274D8BE2E4EN.html>

Date: November 2013

Pages: 30

Price: US\$ 3,995.00 (Single User License)

ID: E274D8BE2E4EN

Abstracts

Abstract:

Urinary incontinence slings are devices inserted into the body to assist incontinence treatment. This is predominantly a female procedure due to the structure of the urinary organs and causes like childbirth and menopause. However, male sling procedures are also performed on a much smaller basis. This procedure involves placing a sling around the urethra to lift it into a position where sufficient urethral compression will help the patient achieve urine control.

Scope of Report: This report pertains to a forecast period of 10 years (2010 – 2020) for the European Market.

Competitor Analysis

Identified Strategic Opportunities

Market Overview by Segment

Trend Analysis by Segment

Market Drivers & Limiters

Mergers & Acquisitions

Customer Feedback & Market Monitoring

Main Segments Included:

PROCEDURES

FEMALE URINARY INCONTINENCE MARKET

Reasons To Buy:

This report analyzes and evaluates the current state of the market including existing and potential markets, product average selling prices, and unit volumes. The report also highlights the opportunities and potential hazards involved, and presents strategies for successfully navigating the market landscape. Furthermore, it seeks to identify the trends and technologies that will affect the future of each market segment and prepares an unbiased critical assessment of such market drivers and limiters based on our “ground up” approach, which includes primary and secondary research methods.
