The aging population and demand for superior dental aesthetics are driving the prosthetics market. The global economic recession of 2008 and 2009 resulted in a slowdown in total market growth; however, the market began to recover in 2010 and is expected to experience accelerating growth by 2017. CAD/CAM manufactured prosthetics are expected to represent the fastest growing segment while the CAD/CAM system market will exhibit high unit growth rates over the forecast period.

Within the European dental prosthetics and CAD/CAM device report, companies such as 3Shape, 3M, Sirona, Degudent and Wieland lead the market, among many others. This report provides a comprehensive and detailed analysis of market revenues by device type, market forecasts through 2017, unit sales, average selling prices, market drivers and limiters and a detailed competitive analysis, including manufacturer market shares and product portfolios.
