Abstracts

In 2007, the German market for vascular access devices was the second largest in Europe. Due to Germany's large population, it is often one of the first European countries targeted for the release of new products. In 2007, the anti-microbial CVC market grew at double digit rates and was one of the largest market segments, while the PICC market was almost absent. Germany is also headquarters to B. Braun, the second largest competitor in the vascular access device market.
