## Abstracts

The Indian dental prosthetics market remains largely traditional. Crowns and bridges in India feature a low rate of CAD/CAM penetration, generally a result of the large initial investment required on the part of laboratories. The domestic market also features low labor costs, which makes it more difficult to justify investment in CAD/CAM technology. However, over the forecast period, use of CAD/CAM technology will grow substantially, largely due to declines in prices of milling machines and CAD/CAM scanners. The Indian dental market is expected to experience both rapid increases in the crowns and bridges market and a low but stable growth rate in the denture market. Scope: forecast period over the next 5 years (2012 - 2017) Report Includes: Competitor Analysis of CAD/CAM Prosthetics Market & CAD/CAM Systems Market.
