## Abstracts

The Indian orthopedic biomaterials market is expected to reach \$71.6 million by 2019. The bone graft substitute segment constitutes the majority of the Indian orthopedic biomaterials market, and is the fastest growing segment.

The Indian orthopedic biomaterials market comprises autologous bone grafts, bone graft substitutes (segmented into allografts, synthetics and demineralized bone matrices) and hyaluronic acid (HA) viscosupplementation. The overall market is still relatively young in India and is expected to continue to grow as a result of the aging Indian population and as new competitors enter the market. Further growth in the overall market is fuelled by the Indian government's efforts to improve healthcare coverage across the country, and by the increasing disposable income of Indian citizens.

**Scope:** This report pertains to a forecast period of 10 years (2009 – 2019) for India.

### Reasons To Buy:

This report analyzes and evaluates the current state of the market including existing and potential markets, product average selling prices, and unit volumes. The report also highlights the opportunities and potential hazards involved, and presents strategies for successfully navigating the market landscape. Furthermore, it seeks to identify the trends and technologies that will affect the future of each market segment and prepares an unbiased critical assessment of such market drivers and limiters based on our “ground up” approach, which includes primary and secondary research methods.
