Abstracts

In 2012, the Japanese market for wound and tissue management was valued at over \$1.5 billion, a 1.6% increase over 2011.

The wound and tissue management market includes wound closure devices, moist dressings, antimicrobial dressings, interactive dressings, traditional dressings, hemostats, tissue sealants, anti-adhesion products and negative pressure wound therapy. Products can be divided into external, internal and combined wound management.

This market is expected to be driven by the increasing aging population, rising rates of obesity and diabetes, as well as the increased device efficiency. This report details the expected growth rates, average selling prices (ASP) and market values of the interlinked segments mentioned above.
