## Abstracts

The Latin American minimally invasive surgery spinal implant market is expected to reach \$60.7 million by 2019, driven by growth in lateral fusion procedures and increasing access to health care services in the region. The Latin American minimally invasive surgery spinal implant market includes minimally invasive interbody fusion and minimally invasive pedicle screws. Growth is expected in both segments as a result of the physiological and surgical advantages of MIS procedures. MIS interbody fusion was the most rapidly growing segment in 2012, followed by MIS pedicle screws.

**Scope:** This report pertains to a forecast period of 10 years (2009 – 2019) for Argentina, Brazil and Mexico.
