Abstracts

The Russian Federation (Russia) dental prosthetics industry can be characterized as one that is poised for growth. With a growing economy and an expanding middle class, an increasing percentage of the population will be able to afford dental procedures. In the last ten years, the Moscow dental market has experienced rapid growth and is expected to grow steadily over the forecast period. The Russian CAD/CAM market is very underdeveloped as compared to European counterparts, and therefore will see double digit growth. The crown and bridges market (PFMs and all-ceramic) will also be a major market driver.
