Abstracts

The Scandinavian market for dental prosthetics includes the the following countries: Sweden, Finland, Denmark and Norway. The Swedish dental market is the largest of any Scandinavian country. Sweden's long-standing government insurance coverage of dental procedures for those over the age of 65 resulted in a high per capita rate of dental prosthetics placement. Over the forecast period, growth in the precious Porcelain-Fused Metal (PFM) and all-ceramic markets will drive growth in the total Scandinavian dental prosthetics devices market.

This report also includes the following market segments:

Crown and Bridge Market

Denture Market

CAD/CAM System Market

CAD/CAM Block and Prosthetic Market

The aging population and demand for superior dental aesthetics are driving the prosthetics market. The global economic recession of 2008 and 2009 resulted in a slowdown in total market growth; however, the market began to recover in 2010 and is expected to experience accelerating growth by 2017. CAD/CAM manufactured prosthetics are expected to represent the fastest growing segment while the CAD/CAM system market will exhibit high unit growth rates over the forecast period.
