Abstracts

In 2008, the market for PACS was valued at almost $1.3 billion, representing an increase of 6.7% over 2007. This market encompasses large hospitals (500+ beds), medium hospitals (201-499 beds), community hospitals (200 beds and under) and imaging centers (non-affiliated). This growth will be fuelled by the sales of PACS, mostly to the community and imaging center markets. Replacement–driven sales will fuel the market for the medium and large hospital sectors. This report also covers the market for electronic medical records.
