## Abstracts

The U.S. market for Cardiac Surgery and Heart Valve Devices will grow at a CAGR of 9.5% over the forecast period.

The U.S. market for Cardiac Surgery and Heart Valve Devices is being sustained by the stability of traditional markets, while its growth is driven by improved technologies and treatment options. The market for mechanical heart valve devices is the only market that is expected to decline over the forecast period. Growth of the total market will be driven by the faster adoption of technologies such as transmyocardial revascularization devices, ventricular assist devices and transcatheter heart valve devices.

The fast adoption rate of these new, expensive devices will be a result of product improvements and changes in physician preferences. The markets covered in this report include those for tissue heart valve, mechanical heart valve, annuloplasty repair, transcatheter heart valve repair, transcatheter heart valve replacement, ONCAB, OPCAB, EVH, anastomosis assist, ablation TMR, ventricular assist, IABP, artificial heart replacement, PFO, ASD and VSD devices.

**Scope:** This report pertains to a forecast period of 10 years (2009 – 2019) for the U.S.
