Abstracts

A rapidly rising number of GPs offering implant treatment continues to drive the dental implant and final abutment market towards historic growth rates.

In 2012, the total U.S. market for dental implants and final abutments was valued at nearly \$979 million. This market includes dental implants, final abutments, dental implant instrument kits and computer guided surgery products. The market is expected to maintain moderate growth rates as the number of dental implant procedures continues to rise, facilitated by the increasing number of dental professionals offering the procedures. Furthermore, implant manufacturers are increasingly bolstering sales of their restorative offerings through supportive technology such as bone graft substitutes and CAD/CAM technology.

Scope: This report pertains to a forecast period of 10 years (2009 – 2019) for the U.S.
