Abstracts

This comprehensive and up-to-date report reviews recent 5G deployments and rollouts in some 11 countries.

Through its international scoreboard, the report highlights moves made by national and regional players and scopes their planned rollouts in 2019, 2020 and further. All in, the trends in China, India, Japan, South Korea, Turkey, USA and in EU5 states (France, Germany, Italy, Spain and the UK) are given in full.

As the race to launch and prelaunch 5G intensifies, the report assesses the growing series of trials and demonstrations which are consolidating provider and consumer interests. This includes an overview of pricing and availability factors, and selection of key cities and placements.

The enabling role of regulation and network assignments, and investment in joint research is underlined, with further data on how inter-provider and network cooperation has boosted the rollout process together with the drive of special events and infrastructural stimuli.

In all the report gives many insights in the application of 5G in a wide range of vertical industries, and infrastructure services including transport routes and remote markets and health, agriculture, construction and culture, and media and entertainment.
