Abstracts

This report provides an analysis of smart city dynamics among five key Asia Pacific Cities.

The analysis drew on the following questions:

What is the national context supporting the development of smart cities?

What are the key urban challenges that cities are facing?

Is the development of smart city initiatives and projects supported by an ongoing smart city strategy or a smart city plan?

What is the governance scheme set up to accompany smart city development?

How cities are dealing with connectivity and data issues, considering these two elements as prerequisite for smart city projects' implementation?

What are the key smart city on-going projects and applications and their overall level of maturity?
