Abstracts

The entire video distribution sector is evolving rapidly, having to contend with consumers taking increasing control over their viewing, inside an increasingly IP-centric environment. To stay competitive, players along the image distribution chain need become more flexible and agile, to keep up with the growing complexity of video distribution. IDATE explores the concept of cloud TV and its role in TV and video ecosystems. The report looks at the way solution providers are positioned, and the strategies they are using to develop cloud TV products. It details the trends we are seeing in solutions, the key technologies being employed, along with the obstacles and opportunities for Cloud TV.

Contents

1. EXECUTIVE SUMMARY

2. METHODOLOGY & DEFINITIONS

- 2.1. General methodology of IDATE's reports
- 2.2. Market assessment and forecasts
- 2.3. Definitions

3. HOW THE NEEDS OF VIDEO DISTRIBUTION ARE CHANGING

- 3.1. Consumer behaviour
- 3.2. Defining customers' needs

4. THE DIFFERENT DIMENSIONS OF CLOUD TV

- 4.1. Market segmentation
- 4.2. The three levels of integration for cloud TV solutions
- 4.3. A new economical approach

5. CLOUD TV: ATTRACTING PLAYERS FROM MULTIPLE BACKGROUNDS

- 5.1. Telecom, Internet, software and TV industry players all jostling for position
- 5.2. A complex ecosystem
- 5.3. Key technologies used in cloud TV solutions
- 5.4. Cloud alternatives using household equipment

6. CLOUD TV PRODUCTS

- 6.1. Managing video on-demand services
- 6.2. Multi-device distribution platforms and TV Everywhere
- 6.3. Diversification & integration of video services
- 6.4. Centralised DRM
- 6.5. Cloud-based production/postproduction solutions
- 6.6. Monetising content

7. OUTLOOK FOR CLOUD TV

7.1. Lingering questions

7.2. Cloud TV: a solution of the future

8. APPENDIX: A SELECTION OF AGREEMENTS

Tables & Figures
