

# Mobile Security Solutions: An Increasingly Insecure Mobile Environment – Markets, Trends & Technologies

<https://marketpublishers.com/r/M192EF84C72EN.html>

Date: May 2016

Pages: 82

Price: US\$ 3,300.00 (Single User License)

ID: M192EF84C72EN

## Abstracts

This report examines the world of mobile security, providing a broad overview of the main players, their strategies and positioning, future trends and the market as a whole – its structuring and value chain (hardware, devices, IT, security, telcos). It examines the threats for mobile, their reach and assessed prevalence. In parallel, the report details key technologies – in use and those upcoming – aimed to secure mobile platforms. Finally, the report provides a strategic analysis of the key drivers and hurdles regarding the mobile security solution market, coming along with data and forecast of the market in value.

The B2B market for mobile security solutions represents 50 to 60% of the total mobile security market. It is largely dominated by software solutions such as Enterprise Mobility Management and Mobile Protection Software. Convergence between platforms and increased smartphone professional use (including for non-office workers) will increase the threat of mobile malware and data loss for companies. The market will thus continue to grow in the years ahead as more and more companies (especially SMEs) invest in solutions to secure their data.

## Contents

### **1. EXECUTIVE SUMMARY**

### **2. METHODOLOGY AND SCOPE**

2.1. General methodology of IDATE's reports

2.2. Scope

### **3. MOBILE SECURITY THREATS, SOLUTIONS AND APPLICATIONS**

3.1. Mobile security threats

3.1.1. Specificities of mobile platforms

3.1.2. Threats and attacks

3.2. Mobile security solutions across platforms

3.2.1. Overview

3.2.2. Baseline protection: Mobile OS and mobile networks

3.2.3. Security frameworks and mobile security applications

3.2.4. Security key enabling technologies

### **4. MARKET STRUCTURE AND PLAYER STRATEGIES**

4.1. Market structure

4.1.1. Value chain

4.1.2. Access to market

4.1.3. Table of market players

4.2. Hardware enabler providers

4.2.1. Secure element and trusted execution environment

4.2.2. Biometric technology

4.3. Baseline protection providers

4.3.1. OS providers

4.3.2. Device manufacturers

4.3.3. Mobile network operators

4.4. Security solution players

4.4.1. Pure players

4.4.2. Security solution providers

4.4.3. IT-solution providers

### **5. STRATEGIC ANALYSIS**

## 5.1. Key drivers

- 5.1.1. Technological push
- 5.1.2. New mobile use cases requiring security
- 5.1.3. Regulation
- 5.1.4. Device market maturity

## 5.2. Barriers

- 5.2.1. Rising baseline protection
- 5.2.2. Lack of strong consumer demand
- 5.2.3. Device market cost sensitivity

## 5.3. Market development and forecasts

- 5.3.1. Key trends
- 5.3.2. Major uncertainties
- 5.3.3. Market forecast

## Tables & Figures

### TABLES & FIGURES

Table 1: Type of malware attacks

Table 2: Means of propagation of malware attacks

Table 3: Comparison of Android OS and iOS security features

Table 4: Types of secure elements

Table 5: Compared protection offered by secure elements, TEE and mobile OS

Table 6: Mobile security solutions' market players

Table 7: Gemalto mobileID solution

Table 8: Lookout consumer offering Free and Premium

Table 9: User concerns around mobile identity and personal data

Figure 1: Mobile platform vulnerabilities

Figure 2: Mobile threats, attacker strategies

Figure 3: Number of Android malwares identified

Figure 4: Number of new mobile malwares identified by McAfee

Figure 5: New malwares (non-mobile) identified by McAfee

Figure 6: Devices with known potential harmful applications

Figure 7: Geography of mobile malware encounter rates, Q3 2015 (% of users attacked)

Figure 8: Web navigation shifts to mobile

Figure 9: Global in-store mobile payment volume

Figure 10: IoT development in volume

Figure 11: Overview of mobile security solutions

Figure 12: iOS security architecture

Figure 13: Abstract overview of mobile networks

Figure 14: Avast Mobile Security and Antivirus

Figure 15: Kaspersky Internet Security

Figure 16: Android Device Manager

Figure 17: Management of mobile devices, content and applications

Figure 18: Protection of corporate network against external mobiles

Figure 19: Using the mobile for authentication

Figure 20: Multifactor authentication

Figure 21: The secure element, as a microSD, UICC embedded in the device

Figure 22: Secure element application domains

Figure 23: Samsung Galaxy S6 Edge, fingerprint sensor

Figure 24: Components of TouchID

Figure 25: Rich OS and TEE comparison

Figure 26: Security in the mobile value chain

- Figure 27: NFC positioning on the security market

- Figure 52: Mobile device: shipments by region
- Figure 53: The threat of rising baseline protections and possible roads to market for B2C solutions
- Figure 54: Credibility of players for the provision of online information
- Figure 55: Security feeling, age and smart cards
- Figure 56: The gap between use and trust
- Figure 57: Global mobile security market (2015 - 2020)
- Figure 58: Global B2B market for mobile security solutions (2015 - 2020)
- Figure 59: Global B2C market for mobile security solutions (2015 - 2020)

## I would like to order

Product name: Mobile Security Solutions: An Increasingly Insecure Mobile Environment – Markets, Trends & Technologies

Product link: <https://marketpublishers.com/r/M192EF84C72EN.html>

Price: US\$ 3,300.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

[info@marketpublishers.com](mailto:info@marketpublishers.com)

## Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/M192EF84C72EN.html>

To pay by Wire Transfer, please, fill in your contact details in the form below:

First name:  
Last name:  
Email:  
Company:  
Address:  
City:  
Zip code:  
Country:  
Tel:  
Fax:
