## Abstracts

Which pathways to broadband PPDR networks?

PPDR usage worldwide is concentrated on a limited number of frequency bands. Among them, the 400 MHz is the most currently used for narrowband systems.

At the WRC-15 in November 2015, a decision is to be taken on allocation of frequencies for broadband PPDR spectrum. The 700 MHz is the best candidate at world level, with distinct scenarios being considered.

TETRA-like narrowband networks have served PPDR issues well in the last decade.

Major PPDR users and industry associations have defined LTE as the technology for broadband PPDR systems.

This report presents the considered pathways to broadband PPDR spectrum and systems for the next decade.

## Contents

### 1. EXECUTIVE SUMMARY

#### 1.1. Status of PPDR allocations

##### 1.1.1. Narrowband spectrum

##### 1.1.2. Broadband spectrum

#### 1.2. PPDR over LTE-A

#### 1.3. Business models for PPDR

### 2. METHODOLOGY & DEFINITIONS

#### 2.1. General methodology of IDATE's reports

#### 2.2. What is PPDR?

### 3. STATUS OF PPDR ALLOCATIONS

#### 3.1. Narrowband Spectrum

3.1.1. The 400 MHz band is used for narrowband PPDR in all Regions.

3.1.2. The 800 MHz band in Regions 2 and 3 (Asia-Pacific, USA)

3.1.3. The 700 MHz band is also used in Region

#### 3.2. Broadband PPDR spectrum

3.2.1. In the USA, the 700 MHz band has already been allocated to PPDR services

3.2.2. In Asia-Pacific, the APT700 MHz plan is likely to be adopted everywhere

3.2.3. In Europe, the 700 MHz is a candidate band alongside the 400 MHz

3.2.4. Alongside the 700 MHz band, the 400 MHz (410-430 MHz and 450-470 MHz) is one of the most propitious candidates for broadband PPDR in Europe

3.2.5. Other bands

3.2.6. Wrap-up: Potential bands for broadband PPDR spectrum

### 4. PPDR OVER LTE-A

#### 4.1. Consensus around LTE for PPDR networks

#### 4.2. Current LTE is not suitable

4.2.1. Extended capabilities are expected with LTE-Advanced

4.2.2. Spectrum and radio access sharing capabilities

### 5. BUSINESS MODELS FOR PPDR

- 5.1. Narrowband/wideband PPDR network as long as possible
- 5.2. Narrowband PPDR network + MVNO agreement for broadband services
  - 5.2.1. Description
  - 5.2.2. Advantages
  - 5.2.3. Disadvantages
  - 5.2.4. Spectrum
  - 5.2.5. Case studies
- 5.3. Narrowband PPDR network + broadband capabilities
  - 5.3.1. Description
  - 5.3.2. Advantages
  - 5.3.3. Disadvantages
  - 5.3.4. Spectrum
  - 5.3.5. Case studies
- 5.4. Commercial mobile network with commercial spectrum and specific requirements
  - 5.4.1. Description
  - 5.4.2. Advantages
  - 5.4.3. Disadvantages
  - 5.4.4. Spectrum
  - 5.4.5. Case study: BDBOS (Germany)
- 5.5. Satellite services in combination with commercial LTE networks with specific requirements
  - 5.5.1. Description
  - 5.5.2. Advantages
  - 5.5.3. Disadvantages
  - 5.5.4. Spectrum
  - 5.5.5. Case studies
- 5.6. Dedicated LTE network with commercial (or shared) spectrum
  - 5.6.1. Description
  - 5.6.2. Advantages
  - 5.6.3. Disadvantages
  - 5.6.4. Spectrum
  - 5.6.5. Case study: the ESMCP in the UK
- 5.7. Dedicated PPDR network with PPDR spectrum
  - 5.7.1. Description
  - 5.7.2. Advantages
  - 5.7.3. Disadvantages
  - 5.7.4. Spectrum
  - 5.7.5. Case study: FirstNet
- 5.8. Business models wrap-up

- 5.8.1. Narrowband PPDR as long as possible
- 5.8.2. Narrowband PPDR+MVNO
- 5.8.3. Narrowband PPDR + LTE with specific requirements / Narrowband PPDR + broadband
- 5.8.4. Narrowband PPDR + LTE + Satellite
- 5.8.5. Dedicated LTE network with commercial spectrum
- 5.8.6. Dedicated PPDR network with PPDR spectrum

## **6. ANNEXES**

- 6.1. Current PPDR networks
- 6.2. A complex landscape to deal with PPDR spectrum
- 6.3. Current LTE bands below 1 GHz

## **7. MAIN REFERENCES**

## **8. LIST OF ACRONYMS**

## Tables

### TABLES

Table 1: Frequency bands below 1 GHz currently used for PPDR applications

Table 2: Business models overview

Table 3: The channeling arrangement proposed by CEPT for WRC-15 in the 700 MHz with options considering Programme Social Making Events (PMSE) and PPDR

Table 4: Potential candidate bands for broadband PPDR by region

Table 5: Overview of European TETRA networks in operation

## Figures
