

# Sport Going Digital: A Driver for Wearables

<https://marketpublishers.com/r/S473BDE20C5EN.html>

Date: December 2016

Pages: 58

Price: US\$ 2,200.00 (Single User License)

ID: S473BDE20C5EN

## Abstracts

This report analyses the digital services and technologies deployed in sport. Particular emphasis is given to wearables, which now account for the majority of products marketed in connected sport.

The report provides an overview of the services and technologies that accompany connected sport.

It goes on to present the positioning and strategies of the main players along the market's value chain.

Lastly, the report provides an estimate of the market up to 2021, and analyses the obstacles and incentives affecting its development.

## Contents

### **1. EXECUTIVE SUMMARY**

### **2. METHODOLOGY & DEFINITIONS**

2.1. General methodology of IDATE's reports

2.2. Scope of the report

### **3. WHAT IS ON OFFER IN THE SPORTS ENVIRONMENT?**

3.1. General architecture

3.2. Hardware

3.2.1. Embedded sensors

3.2.2. External sensors

3.2.3. Illustration of embedded sensors and external sensors for use in sport

3.3. Connectivity

3.3.1. Wireless Personal Area Network (WPAN)

3.3.2. Wi-Fi

3.3.3. Bluetooth

3.3.4. Cellular

3.3.5. LPWA

3.4. Middleware

3.4.1. Data aggregation platforms

3.4.2. Big data

3.5. Applications

3.5.1. Measuring performance

3.5.2. Safety

3.6. Connected objects spread to all sports

### **4. POSITIONING OF MARKET PLAYERS**

4.1. General sports equipment manufacturers

4.1.1. Under Armour

4.1.2. Adidas

4.1.3. Nike

4.1.4. Other players

4.2. Specialised sports accessory manufacturers

4.2.1. Garmin

- 4.2.2. Polar
- 4.2.3. Suunto
- 4.3. Pure players
  - 4.3.1. Sensors
  - 4.3.2. Connected wristbands/watches
  - 4.3.3. Applications
- 4.4. CE manufacturers
- 4.5. Internet players
- 4.6. Telecom operators
- 4.7. The major sports brands and electronics giants are expanding their presence on the value chain

## **5. MARKET AND FORECASTS**

- 5.1. Forecasts ....
  - 5.1.1. Demand
  - 5.1.2. The market by segment
  - 5.1.3. The market by geographical region
- 5.2. Market strengths and weaknesses
  - 5.2.1. Strengths
  - 5.2.2. Weaknesses
- 5.3. How will the business models evolve?
  - 5.3.1. Revenues focused on the sale of devices...
  - 5.3.2. ...but applications do provide added value
  - 5.3.3. A means of fostering customer loyalty
  - 5.3.4. Towards a B2B2C model?
  - 5.3.5. The big IoT groups are moving to the centre of value chains

## Tables & Figures

### TABLES & FIGURES

- Table 1: Example of a tennis racket fitted with sensors
- Table 2: Benefits and weaknesses of embedded sensors and external sensors
- Table 3: Features of the main short-range technologies
- Table 4: Benefits and weaknesses of cellular connectivity
- Table 5: Benefits and weaknesses of LPWA connectivity
- Table 6: Main API and SDK platforms
- Table 7: Comparison between the main 'Quantified Self' running apps
- Table 8: Sports targeted by connected services
- Table 9: Hardware and software provided by the top three sports equipment brands
- Table 10: Products and software provided by sports accessory companies
- Table 11 : Type of products offered by pure players
- Table 12: Main acquisitions in the connected sports business
- Table 13: Main partnerships in the connected sports business
- Table 14: Cost comparison of three sports items
- Table 15: Main initiatives of insurance companies in sport and well-being
- Figure 1: Common architecture for most wearable devices
- Figure 2: Block diagram of a sensor node
- Figure 3: Methods of connecting a connected object
- Figure 4: Different sensors on the human body
- Figure 5: Examples of connected wristbands and watches for sport
- Figure 6: Multisport PIQ sensor
- Figure 7: MC10 skin sensor
- Figure 8: Overview of a Personal Area Network ecosystem
- Figure 9: Main technologies in use according to bandwidth (in Mbps) and reach
- Figure 10: Different consumption levels for different states
- Figure 11: Technical comparison between the two versions of Bluetooth
- Figure 12: Capturs tracker
- Figure 13: Google Fit SDK principle
- Figure 14: Connection between the Apple Watch and the Health app
- Figure 15: Example of big data tennis analysis
- Figure 16: Connected wristbands for fitness and sports
- Figure 17: Connected fabrics
- Figure 18: Wilson's connected basketball
- Figure 19 : Viper Pod tracking system
- Figure 20: Reebok Connected CheckLight Cap

- Figure 21: Connected cyclist helmet
- Figure 22: Characteristics users want in a smart watch
- Figure 23: Apple Watch Nike+
- Figure 24: HTC's and Under Armour's HealthBox
- Figure 25: List of partners for Google Fit
- Figure 26: Verizon's Sports & Fitness store
- Figure 27: LeEco Super Bike (will be connected exclusively to the AT&T network)
- Figure 28: Differences in key positioning of the various operators in the sport market
- Figure 29: Positioning of the main players along the connected sport value chain
- Figure 30: Sales of connected sports equipment worldwide, by category, 2014-2021
- Figure 31: Installed base of connected sports equipment worldwide, by category, 2015-2021
- Figure 32: Evolution of installed base of connected sports equipment by region, 2015-2021
- Figure 33: Sports sales worldwide
- Figure 34: Share of revenues linked to wearables technologies
- Figure 35: User demand for IoT
- Figure 36: Connected sports products according to user level
- Figure 37: Main challenges for the Internet of Things
- Figure 38: The running market
- Figure 39: Several examples of connected wristband designs
- Figure 40: Paris Nike Run Club webpage
- Figure 41: Description of business models based on the sale of data
- Figure 42 : Withings Pulse
- Figure 43: Vitality status based on rate of savings

## I would like to order

Product name: Sport Going Digital: A Driver for Wearables

Product link: <https://marketpublishers.com/r/S473BDE20C5EN.html>

Price: US\$ 2,200.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
