Abstracts

No longer just a regulatory 'punishment', there are good business reasons for separation.

This report reviews the concept of vertical separation and its changing role for the telecoms industry.

'Vertical separation' encompasses different concepts, ranging from rather mild reporting requirements to full ownership separation.

The report shows that the concept is not unique to telecoms, but has been implemented in a great many industries.

Within telecoms, vertical separation was long considered a regulatory remedy for those cases where a dominant operator discriminated unduly against its rivals.

The report sheds light on the main drivers of separation, and how they are changing this situation and are making vertical separation a reasonable business strategy for operators.

A number of case studies will illustrate the approaches already taken by several operators towards separation and how the current trend is evolving towards voluntary separation.

A conclusion wraps up this report.

Contents

1. EXECUTIVE SUMMARY

2. INTRODUCTION

- 2.1. What is vertical separation?
- 2.2. Flavours of separation

3. THE RELEVANCE OF VERTICAL SEPARATION

- 3.1. Vertical separation is already practised across all network industries...
- 3.2. ...and is discussed time and again for big tech

4. SEPARATION DRIVERS

- 4.1. Vertical separation: from stick to carrot?
- 4.2. The reason why the Code favours vertical separation
- 4.3. The well-managed quality of service of wholesale products facilitates separation
- 4.4. A promising long-term investment

5. SEPARATION CASES

- 5.1. Openreach
- 5.2. TDC
- 5.3. TIM: from 'voluntary' functional separation to voluntary structural separation?
- 5.4. CETIN/O2 CZ: the first operator to implement truly voluntary separation
- 5.5. Vertical separation is not a 'fixed-only' phenomenon

6. WRAP-UP

- 6.1. Separation sees the convergence or combination of three essential forces
- 6.2. Telcos should explore the separation option

List Of Tables

LIST OF TABLES AND FIGURES

What is vertical separation

The differing extents of separation

Some European industries – railways are an example – are already well advanced

From regulatory ‘nuclear option’ ... to sound business decisions

Europe trailing US investments levels

Open access wholesale model

Ladder of investment

Network slicing in mobile

Trends in the share prices of O2 CZ/CETIN

BT Wholesale/Openreach catering to CSPs

Ofcom assessment of Openreach separation

De-branding of Openreach vans

TDC Nuuday and NetCo

TDC separation approach

Telecom Italia Open Access

TIM divestment considerations for Elliot

TIM Management Plan 2018

TIM/Open Fiber considerations

CETIN separation

Trends in O2 CZ share prices

CETIN EBITDA and EBITDA margin

UK cell site operators

Alignment of major forces for separation
