REPORT SYNOPSIS

Hydrocolloids demand in Europe is driven by increasing demand from food & beverages. Food additives are becoming a necessary part of food and beverages industry and natural clean label food additives such as hydrocolloids penetration is on the rise. The hydrocolloids industry is forecast to receive an impetus from this booming demand. Oil & gas and food & beverages applications are forecast to record robust growth in the Middle & Africa region. Increasing health consciousness and changing eating habits of consumers, especially in developing countries of MEA, are the driving factors for hydrocolloids growth in the food and beverage sector.

Germany constitutes the single largest market for Hydrocolloids in Europe, estimated to account for 21% share in 2018 and further expected to reach 156.7 thousand metric tons by 2024. The overall Hydrocolloids market in Middle & Africa region is projected to touch US\$1 billion by 2020.
