REPORT SYNOPSIS

The impact of COVID-19 pandemic on global enteral feeding devices market is expected to differ in intensity depending on the device type. Sharpest declines would be expected in demand for PEG/J Kits, Low-Profile Devices and Gastrointestinal Tubes, due to cancelled or delayed elective procedures and delays in tube replacements. On the other hand, demand for Feeding Pumps, Nasointestinal Tubes and Giving/Extension Sets is forecast to witness robust gains during 2019-2020, due to the extra demand created from COVID-19 related ICU admissions.

Demand for Feeding Pumps across the globe is expected to record a robust y-o-y growth of over 14% in terms of both volume and value in 2020, followed by Giving/Extension Sets and Nasointestinal Tubes. The overall global market for Enteral Feeding Devices is expected to exceed 100 million by 2026.
